

# The air duct direct heating line burners

**L.LAIR**

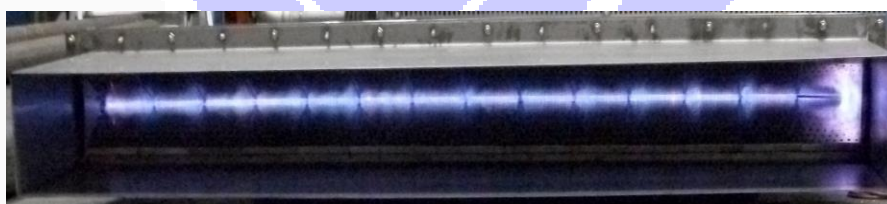

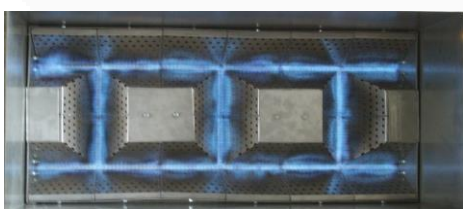

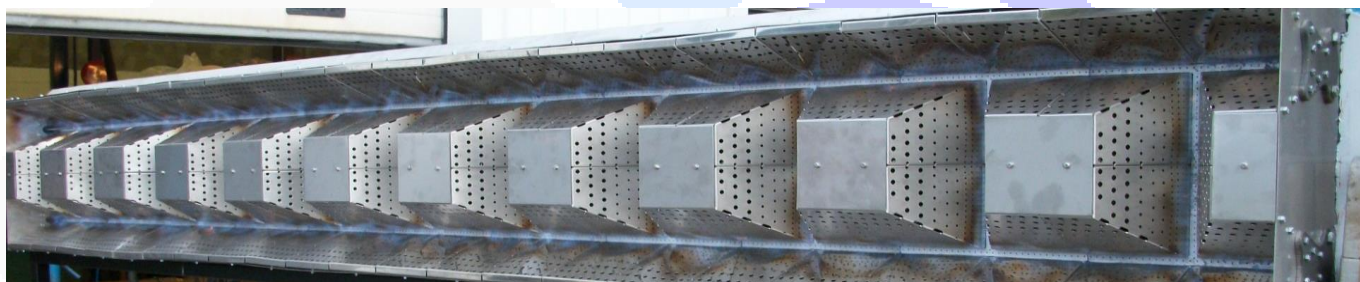

100 % MADE IN FRANCE

## VEINAIRFLAM : "The" line Burner

*Standard burner with a **very high turn down ratio** for POWER SUPPLIED from 5 KW until gas safeties equipment limits (P = 150 KW max. per ½ unit of 152 mm).*

## VEINAIRFLAM-V : line "BOX" Burner

*Standard burner with air combustion blower integrated and **very high turn down ratio** for varying air ducts flows or recycled air processes & for POWER SUPPLIED from 5 KW until gas safeties equipment limits (IDENTICAL VEINAIRFLAM BURNER).*

**Common applications:** Direct fresh or recycled air Heating, Air conditioning for metal finishing (plastic paintings, coating spray applications ...), induct firing, all Dryers, fresh Air conditioning, Textiles Driers, Driers in the chemical industry, Spray dryers, printing machines, Sand & Glass drying, baking, grain dryers, auxiliary heating downstream from steam batteries or to replace those, Rotary drum ovens, Ovens with recirculated air, and much more...

## INDUSTRIAL HEATING SYSTEMS MANUFACTURER - GAS BURNERS

Gas Lines & Regulations – Safety & Flame Monitoring – Safe Guards & Controllers – Solutions  
Gas Safety & Detection – On site Services - Spare parts & components for industrial heating systems

L.LAIR Sarl - ZA du TUBOEUF - 115 allée des ORMETEAUX - 77170 - Brie Comte Robert - FRANCE
